# Photography

for Professionals

Precision every pro can rely on.

For professionals, ColorEdge stands for absolute precision and reliability. Whether your subjects are people, landscapes, wildlife, or something else, ColorEdge faithfully reproduces every tone, and detail with exceptional accuracy.

Studio Shooting  
Location Shooting  
Photo Editing & Printing  
Presenting to Clients

# Photography

for Enthusiasts

Engage in your creative passions.

ColorEdge offers the perfect balance of colour accuracy and comfort for aspiring creatives and enthusiasts of all levels. Engage in your passions with confidence knowing that what you see is what you get every time.

Hobby Photography  
Videography  
Photo Printing at Home  
Web Image Creation

# Post-Production

# Illustration

Streamlined workflow for any size project.

Enjoy creating with peace of mind.

The ColorEdge range covers the entire post-production workflow from shooting to colour grading to ensure creators and editors view a consistent image throughout the pipeline. With automatic calibration, HDR, and other features for world-class video production, ColorEdge is a reliable partner for every studio.

Enjoy illustrating your personal projects comfortably with ColorEdge. Every colour and detail displays correctly so you can stay focused on creating.

Material Digitization  
Colour Mapping

## 1 In-House Production with No Compromises

From the IC chip to unique software, ColorEdge is built from the ground up in-house to ensure the highest precision. EIZO's rigorous quality control and high production standards ensure that every monitor is accurate when it leaves the factory.

ColorEdge Users Case studies

Learn more >>

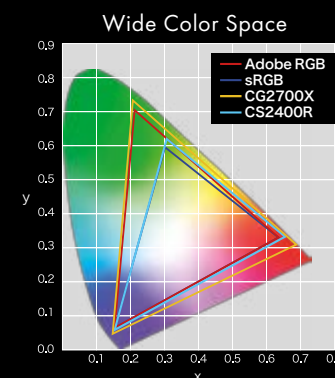

# True Reproducibility for the Perfect Image

## 2 Faithful Colour Reproduction with Wide Colour Gamut

ColorEdge monitors feature a wide colour gamut that covers the full sRGB and almost all of the Adobe RGB\* colour spaces for faithful image reproduction. In addition, the CG series covers almost the entire DCI-P3 standard used in digital cinema and supports the BT.2020 standard used in broadcasting.

\*Excludes CS2400R

## 3 Adjusted at the Factory for Smooth Gradations

The gamma level for each monitor is adjusted at the factory by measuring the red (R), green (G), and blue (B) gamma values from 0 - 1023. Their 16- or 24-bit LUT\* is then used to select the 1024 most appropriate tones for the smoothest colour gradations, resulting in images without deviated steps.

\*CG1 and CG3100X utilise a 24-bit LUT

Grayscale Gradation Steps

## 4 Uniformity Across the Screen

LCD monitors commonly exhibit fluctuations in brightness and chromaticity across the screen, affecting colour accuracy. To counter this, ColorEdge monitors are equipped with EIZO's patented digital uniformity equalizer (DUE) technology which corrects deviations in every tone across the screen to ensure stable display.

\*Japan patent no. 5651419

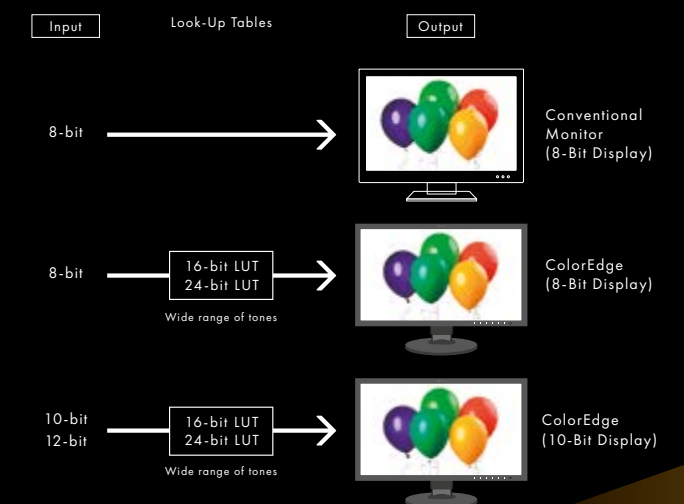

## 5 10-Bit Simultaneous Display

The monitors offer 10-bit simultaneous display from a 16- or 24-bit LUT\*, which means they can display more than one billion colours at the same time. This ensures smooth colour gradations and reduced Delta-E between two adjacent colours.

DVI connections display at 8-bit. A graphics board and software which support 10-bit output are necessary for 10-bit display. Equipment that supports Deep Color is required for 10-bit display through an HDMI® signal.

\*CG1 and CG3100X utilise a 24-bit LUT.

# 1 Built-In Calibration Sensor to Automate Your Workflow

CG series monitors are equipped with EIZO's patented built-in sensor\*, which can be set to calibrate automatically at designated times. This eliminates the need for a third-party calibration device and ensures the screen stays colour accurate.

\*Japan patent no. 5202654, 4809453, 6283555

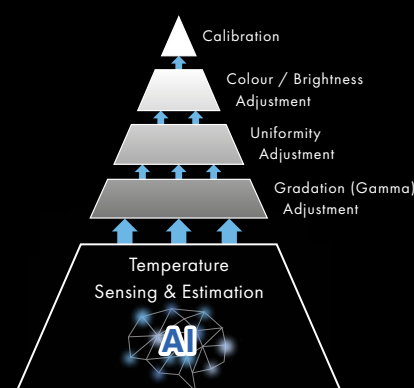

Sensor swings onto the monitor only when calibrating.

# 2 Stable Display Using Industry-First AI

The monitors are equipped with a sensor that measures the temperature inside the monitor and estimates the ambient room temperature. Using this technology, they adjust in real time to maintain accurate gradation, colour, brightness, and other characteristics. In addition, AI\* is used in the estimation algorithm to detect and distinguish patterns in temperature changes for more precise calculations, ensuring a stable and accurate display.

\*Japan patent no. 6723964

# 3 4K High Resolution for Extreme Detail

The CG series offers both DCI 4K (CG1, CG3100X) and 4K UHD (CG2700X) monitors in its lineup for displaying high resolution content with extreme detail. The CG1 is the ideal solution for referencing and colour grading, while the CG3100X and CG2700X are perfect for post-production work.

## CG Series Features for the Creative Professional

# 4 Stable Color in Just 3 Minutes

While a typical monitor takes 30 minutes or more for its brightness, chromaticity, and tone characteristics to stabilise, CG series monitors take just 3 minutes. Whether working in a studio or on location, you get reliable colour display soon after turning the monitor on.

# 5 HDR Video Workflow

The monitors are equipped with dedicated functions to support use in HDR video workflows. Functions include HDR gamma support, broadcast and cinema presets, and film emulation using a 3D LUT file.

# 6 True Black Display

In compliance with the DCI standard, CG series monitors offer contrast ratios up to 1800:1\* for producing true blacks that are otherwise difficult to display. They are also equipped with a retardation film, allowing tones to retain their depth even when viewed from an angle.

\*CG1 offers 1,000,000:1 contrast ratio

# 7 Protect Your Screen from Glare

The monitors come bundled with a light shielding hood that effectively prevents glare on the screen caused by ambient lighting. It attaches magnetically for quick and easy setup.

Excludes CG1

ColorEdge Monitor

Conventional Monitor

## Single Cable Connection with USB Type-C

Make effective use of your workspace via a single cable. The monitors are equipped with USB Type-C connectivity for streamlined connection. Power delivery to connected devices is also supported.\*

\*Number of watts delivered varies by model  
Excludes CG1

## Stable Network Connection

The CG3100X, CG2700X, and CG2700S have a LAN port directly built in for stable wired connection. Connecting a laptop via USB Type-C provides access to the network through the monitor for sharing creative assets and files, or when working remotely.

## Highly Versatile Stand

Adjust the screen to the most comfortable angle or reposition it to show your work to a colleague or client. The versatile stand offers height, tilt, and swivel adjustment.

Range of motion varies by model  
Excludes CG1

Pictured: CG2700X / CG2700S

## Sleek, User-Friendly Design

### Bezels

Slim Bezels

ColorEdge monitors feature unobtrusive bezels so you can stay comfortable and focus more on the screen.

### Switches

Seamless Electrostatic Switches

Electrostatic switches on the front allow for seamless access to monitor settings.

Excludes CG1

### Handle

Built-In Carrying Handle

Easily move the monitor from one location to another via the built-in carrying handle on the back.

## Comfort and Ease-of-Use

### Easy-Access USB Ports

Easily connect a mouse, keyboard, or other peripherals using the multiple USB ports conveniently located on the side of the monitors.

### Non-Glare Panel for a Clear View

To ensure high visibility, the monitors are equipped with an IPS non-glare panel. They also use dimming technology to minimize flicker and help prevent eye fatigue for a more comfortable working environment.

### Light Shielding Hood

A light shielding hood is bundled with CG series monitors and can be added separately for CS series monitors.

Excludes CG1

# ColorNavigator 7

## High-Precision Colour Management

ColorNavigator 7 is EIZO's unique colour management software solution for adjusting and maintaining colour accuracy of ColorEdge monitors. It makes calibration simple and produces predictable results for all creative fields.

## Multiple Colour Modes to Suit Your Field

Photography, design, print, web, and more - ColorNavigator 7 includes multiple color modes so you can choose the one that matches your target values. The list is populated according to the monitor's OSD menu so all possible options are covered. Furthermore, you can calibrate all color modes (Standard Mode) simultaneously, saving you time while ensuring your screen remains accurate.

Example Color Modes

sRGB  
Brightness: 120 cd/m<sup>2</sup>  
Color Temperature: 6500K  
Gamma: 2.2  
Gamut: sRGB

Adobe RGB  
Brightness: 120 cd/m<sup>2</sup>  
Color Temperature: 6500K  
Gamma: 2.2  
Gamut: Adobe RGB

Print Proofing  
Brightness: 120 cd/m<sup>2</sup>  
Color Temperature: 5000K  
Gamma: 2.2  
With Gray Balance  
Gamut: Native

## Change Modes at the Touch of a Button

After calibrating with ColorNavigator 7, you can change the display mode via the switches or buttons on the front of the monitor.

## External Calibration Sensor

### EX5

The EX5 is a dedicated external sensor for calibrating your ColorEdge monitor using ColorNavigator 7.

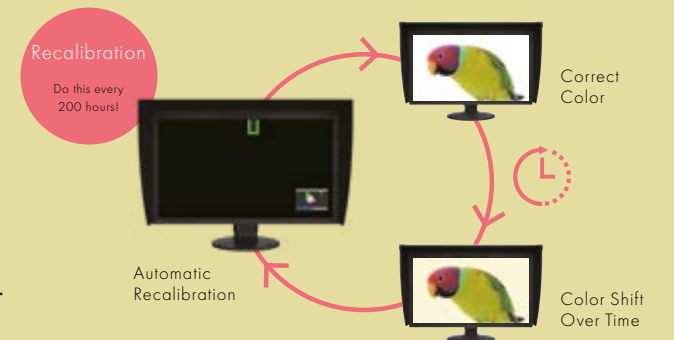

## What is Calibration?

Calibration is a method by which a monitor's display characteristics are adjusted to a target value using a dedicated sensor. Software calibration modifies the signal from your graphics board and is available for conventional monitors. ColorEdge monitors and ColorNavigator 7 carry out hardware calibration, which controls the hardware of the monitor directly by utilizing its LUT. This method offers higher precision and better gradation characteristics compared to software calibration.

## Schedule Automatic Recalibration

A monitor needs to be recalibrated at regular intervals to maintain color accuracy. With ColorNavigator 7, you can schedule a CG series monitor with built-in sensor to automatically recalibrate at a specific time or at regular intervals.

## Maintain Calibration Settings Even on Different PCs

With ColorNavigator 7, calibration information carried out by the administrator is saved to each ColorEdge monitor instead of the OS so users do not need to recalibrate even when using a different PC.

## Correlation with Spectrophotometers

Many post-production, VFX, and broadcasting studios define a specific spectrophotometer as the master sensor for their internal colour management framework. CG series built-in calibration sensors can be correlated to any high-end spectrophotometer using ColorNavigator 7 to ensure each project meets defined standards.

Network Colour Management Software

# ColorNavigator Network

For studios with multiple monitors

ColorNavigator Network provides centralized quality control (QC) of ColorEdge monitors for studios, printing houses, and other enterprises with multiple creators and editors who work on shared projects. With NetAgent or ColorNavigator 7 installed on the workstation, administrators can manage multiple ColorEdge monitors via web browser, enabling QC even from remote locations.

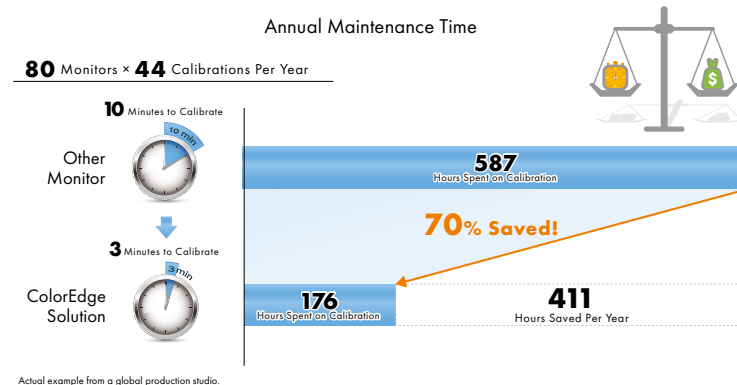

## ColorNavigator Network Secure Cloud Server

### Features

- ✓ Calibrate all monitors remotely
- ✓ Assign colour modes to monitors based on project
- ✓ Check monitor status and manage assets
- ✓ Consistent colour communication between editors
- ✓ Hosted on a secure cloud server

### Save Time and Labor

API for Application Integration

EIZO's free ColorNavigator and ColorNavigator Network APIs are available for software developers and system administrators to integrate colour management software functions into third-party applications.

Easy Screen-to-Print Colour Matching Tool

# QUICK COLOR MATCH

For printing photos at home

Even with all the right equipment, colour matching can be tedious. Quick Color Match greatly simplifies the process by automatically adjusting to the ideal monitor, retouching software, and printer settings so you can stay focused on editing. Simply drag and drop your photo to begin printing your work hassle-free.

## Simplify the Colour Matching Process

## Recommended Screen-to-Print Setup

Dimensions (Unit: mm)										

<sup>1</sup> 5 years from date of purchase (up to 30,000 hours of usage time for main body and up to 10,000 hours for LCD panel). When used at a colour temperature of 6500K, a brightness of at least 800 cd/m<sup>2</sup> is warranted for 5 years from date of purchase (up to 10,000 hours of usage time).

<sup>2</sup> 5 years from date of purchase (up to 30,000 hours of usage time for main body and LCD panel). When used at a colour temperature of 5000 - 6500K, a brightness of at least 120 cd/m<sup>2</sup> is warranted for 5 years from date of purchase (up to 10,000 hours of usage time).

<sup>3</sup> 5 years from date of purchase (up to 30,000 hours of usage time for main body and LCD panel).

• Zero bright (fully-lit) sub-pixels warranted for 6 months from date of purchase.

Extensive Market Reach

FlexScan

Business Enterprise

ColorEdge

Creative Work

CuratOR / RadiForce

Healthcare

DuraVision / VisionCore

Security / Infrastructure / Maritime

Raptor / Re/Vue / SafeGuard

Air Traffic Control

50+ Years of Expertise

Visual Technology Company

Research and Development

Manufacturing

Quality Control

Customisation

Innovative Solutions

Built-In Colour Calibration Sensors

Automatically calibrates while you work

IP Decoding Solutions

PC-less connection

Switch

Visibility Enhancement Technology

Ultra-High Sensitivity HD Cameras

Image Optimization Solutions

Market-Focused Cloud Solutions

Air Traffic Control

Creative Work

Healthcare

Software for Improved Workflow

Use a single mouse across two PCs

Synchronized adjustment of multiple monitors

Simplified CMS with automatic software and printer settings adjustment
